## 2022 FALL RATES

### **STORAGE:**

CORN: 20 cents minimum to Jan. 1, 2023, then 3 cents per bushel per month (.001 per day)

SOYBEANS: 20 cents minimum to Jan. 1, 2023, then 3 cents per bushel per month (.001 per day)

Corn and soybeans still in storage on September 1, 2023, will be charged a new minimum storage plus a rollover charge at a rate to be determined.

### **DELAYED PRICING:**

CORN: 18 cents minimum service charge to Jan. 1, 2023, then 3 cents per bushel per month (.001 per day)

SOYBEANS: 18 cents minimum service charge to Jan. 1, 2023, then 3 cents per bushel per month (.001 per day)

**Harvest delivered grain that is not sold or applied to contract within 7 calendar days (1 week) of delivery will be placed in storage and minimum storage rates and additional shrink on corn will apply.**

**It is the tenant's responsibility to notify the landlord their crop has been harvested and delivered to the elevator.**

Storage charges will be deducted at time of settlement.

Storage must be prepaid on commodity loans.

Grain hauled in after harvest from bins will have a 7 day grace period, then a daily storage rate will apply. (unless other arrangements are made)

### **Drying Charges (in cents per bushel):**

15.1%-16.0%- .045 cents	20.1%-21.0%- .24 cents	25.1%-26.0% - .315 cents	30.1%-31.0%- .39 cents
16.1%-17.0%- .09 cents	21.1%-22.0%- .255 cents	26.1%-27.0%- .33 cents	31.1%-32.0%- .405 cents
17.1%-18.0%- .135 cents	22.1%-23.0%- .27 cents	27.1%-28.0%- .345 cents	32.1%-33.0%- .42 cents
18.1%-19.0%- .18 cents	23.1%-24.0%- .285 cents	28.1%-29.0%- .36 cents	33.1%-34.0%- .435 cents
19.1%-20.0%- .225 cents	24.1%-25.0%- .30 cents	29.1%-30.0%- .375 cents	34.1%-35.0%- .45 cents

Drying rates are subject to change.

Drying charges will be deducted from the settlements and checks on corn that is applied to contract or sold at harvest.

Drying charges on corn that is not sold at harvest will be billed during harvest and due Jan. 5th, 2023.

Drying charges for corn placed under commodity loan is due when the warehouse receipt is issued.

**Shrink:** Corn that is sold or applied to Delayed Pricing at harvest (within 7 days of delivery) or applied to a fall contract will be dried and shrunk to 15% moisture. Corn put in storage will be shrunk to 14% moisture. The shrink factor for corn will be 1.35% for each point of moisture. All corn loads will stand alone. Drying will be calculated on wet bushels.

**Soybeans:** Soybeans will be shrunk to 13.0% moisture. Bean moisture will be averaged by the day (on each individual delivery sheet) up to a maximum moisture of 15.0%. Shrink will be computed at 1.5% for each ½ point from 13.1% to 15.0%. Shrink will be computed at 2.5% for each ½ point above 15.1%.

Foreign Material (FM): 1.0% is allowed. Anything above 1.0% will result in a direct weight deduction on a load by load basis. (Pods are considered FM)

Market scale of discounts to apply for any factors below grade.
